Degree/Board	Institution	Year	CGPA/%
B.Tech, CE	IIT Bhubaneswar, Bhubaneswar	2023 - 2027	8.33/10.0
XII – PCM	G.N.W.S, Greater Noida	2022	92%

PROJECTS

EquiPulse [Link]

Real-Time Equity News Clustering and Insights Engine Jan’26

- Implemented Airflow DAGs to fetch market news via external APIs and ingest raw articles in Kafka and MongoDB.
- Applied NLP-based company tagging to identify relevant companies from unstructured news content.
- Generated text embeddings and stored vectors in Qdrant to enable similarity search and clustering.
- Built real-time DBSCAN-based clustering to create or update new company-level news clusters, and generated company-level insights to surface equity-related market developments.
- Tech: **Python, Airflow, MongoDB, Qdrant, NLP, DBSCAN, Gemini, REST APIs**

GovAssist AI [Link]

AI Agent for Hindi Government Scheme Assistance Nov’25

- Designed and built a voice-enabled AI agent to assist Hindi-speaking users by determining eligibility for Indian government schemes using structured demographic inputs.
- Integrated Whisper-based speech-to-text, a rule-driven eligibility engine, and LLM-powered response generation to deliver accurate, conversational guidance.
- Implemented multi-turn session memory and intelligent missing-field detection; tested with 30+ users achieving average end-to-end response latency of 5–10 seconds.
- Tech Stack : **Python, Whisper, LLMs, Streamlit**

WhatsApp Chat Analyzer [Link]

Data Analysis and Visualization Platform for chat monitoring Oct’24

- Developed an end-to-end analytics platform to derive behavioral, temporal, and sentiment insights from WhatsApp chat exports using NLP and interactive visualizations.
- Efficiently processed and analyzed 1M+ chat messages using Pandas-based pipelines with features like activity heatmaps, sentiment trends, and interactive charts via Streamlit.
- Tech Stack: **Python, Pandas, Streamlit, Plotly, Matplotlib, Seaborn, WordCloud, Urlextract, Emoji, Data Visualization.**

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript
Frameworks/Libraries: Node.js, Express.js, LangChain, LangGraph, Pydantic
Databases: MySQL, MongoDB, Chroma
Machine Learning: TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Rag Pipelines
Tools: Git, GitHub, Postman, Jupyter Notebook , Ollama
Other Skills: Problem Solving, System Design, Cross-functional Team Collaboration and Leadership

POSITIONS OF RESPONSIBILITY

C.N. 10x Club (Campus Chapter)

EMERGING CEO JAN’25 – DEC’25

- Served as an emerging ceo by promoting technical programs, learning resources, and events among students through workshops, sessions, and online outreach.
- Increased participation in coding contests, learning tracks, and developer initiatives.

WORK EXPERIENCE

Innoveda Solutions

Greater Noida / India

Co-Founder

Dec’ 25 – Present

- Co-founded and scaled web development agency from inception to serving 15+ enterprise clients, through strategic client acquisition and end-to-end project management.
- Architected **DreamTownRealty**, a full-stack real estate platform using React.js and Node.js with JWT authentication, managing 200+ daily active users .
- Led development of **Kashi-Dream Guest house** hotel booking platform, implementing dynamic pricing modules and payment gateway integration—boosting user engagement by 35% and conversion rates by 22% .
- Delivered 2+ custom portfolio websites with GenAI-powered features, SEO optimization, and responsive frameworks, increasing client lead generation by 50% through strategic architecture and AI integration.

TechPranee

Hyderabad / India

SDE Intern

September’25 – December’25

- Developed 15+ AI-generated web component designs using Lovable platform for **ERPZ** warehouse management system, reducing design-to-code time from 2 days to 4 hours and accelerating prototyping cycle by 60%.
- Built reusable code template library using Ollama LLM, generating 30+ production-ready React and Node.js templates that improved team development velocity by 45% across 4-member engineering team.
- Optimized **ERPZ** application performance through GenAI-powered code reviews, worked closely with backend team to design efficient database schemas and ensure data consistency..

ACHIEVEMENTS

- Chosen as one of the participants from 85,000+ applicants in **Samsung Solve for Tomorrow 2025**.
- AIR 466, 492, 748, 840 out of 40K+ in **Leetcode Weekly and Biweekly contests**.
- Selected as one of the delegates from 50,000+ applicants in **Harvard PAIR by Harvard University, USA**.
- Anveshan Hackathon 2024 — Finalist** (Collaborated with 5-member team to develop AI-powered automated billing system using computer vision and machine learning, processing 10+ grocery items with 88% detection accuracy and reducing checkout time by 60%)
- Summerhack 1.0 2025 — Finalist** (Built full-stack food ordering platform for college canteen with real-time order processing, capable of serving 50+ students and improving service efficiency by 40%)
- Knight** LeetCode (Rating: 2024), Top 2.24%, solved over 1600+ problems on the platform, constantly uploads and explain solutions have over 50k+ views.
- Pupil** Codeforces (Rating: 1210) , 150+problems.
- Codolio** (Ranking: 302), Among top problem solvers on the platform.
- Other Hackathons:** Flipkart Grid 6.0 and 7.0 , Adobe India hackathon, HackWithInfy 2026, Odoo x CGC, DTU Execute 3.0, Hackfest-Advaita .
